Soft Skills — Problem Solving, Communication & Collaboration, Leadership & Team Coordination, Time Management, Adaptability & Continuous Learning

Projects

FU Media - AI-Powered File Management System,

Capstone Project; Role: Project Leader, Web Developer

02/2025 – 05/2025

- Developed an AI-powered system using Python, OpenCV, and YOLO to process and classify 100+ image and video files, improving retrieval efficiency through automated tagging and keyword-based search, which reduced manual file searching time for users.

5S Plumbing – Business Website Development,

Web Developer (Freelance Project)

- Developed a responsive business website using WordPress and GoDaddy, creating 10+ service and informational pages, which improved the company's online visibility and customer accessibility.

Certificates

- Certified Artificial Intelligence Professional (CAIP)
- PhilNITS Certification – Passer
- Cisco Cyber Threat Management

Work Experience

Customer Service Representative, *TTEC*

02/2026 – 06/2026 | Dumaguete City, PH

- Resolved 10–15 daily hardware, software, and network-related issues, minimizing downtime and ensuring continuous system availability, which improved operational productivity across workstations.
- Installed and configured 20+ system setups and software deployments, improving workstation readiness and operational efficiency, which helped support smooth day-to-day business operations.
- Documented 50+ troubleshooting cases and system configurations, enhancing knowledge sharing and improving issue resolution efficiency, which reduced repeated troubleshooting efforts within the team.

IT Intern, *Inspiro*

02/2025 – 04/2025 | Dumaguete City, PH

- Resolved 10–15 daily hardware, software, and network-related issues, minimizing downtime and ensuring continuous system availability, which improved operational productivity across workstations.
